

CitraClean

Biodegradable synthetic coatings, asphalt, mastic and tar remover

Description

CitraClean is a completely new way of cleaning and degreasing and is based on a 100% organic formula containing no petroleum distillates halides or any other hazardous ingredients. It is a clear, low viscosity liquid miscible with water with an odour of citrus fruit.

Uses

CitraClean is specifically formulated to remove synthetic finish splashes from building surfaces, tools and equipment and may also be used to remove grease, tar, mastic and adhesives from most surfaces.

Application Method

Used undiluted it may be sprayed, wiped or dabbed onto the surface to be cleaned. Allow a 2 to 5 minutes contact time, dependent on the thickness of residue to be removed, then wipe or rinse off with clean water. Repeat as necessary.

Packaging

5 litre poly bottle.

Storage

CitraClean must be stored between 0°C to 40°C. In original unopened packaging it has a shelf life of one year.

Cautions and limitations

It is advised that the suitability of CitraClean and its compatibility with surrounding materials is assessed in a small unobtrusive area, before proceeding with the main application. Protect plants and paintwork during application.

Cleaning

Clean all tools immediately after use with a dry cloth.

Health & Safety

Consult with the latest product Safety Data Sheet.
